

Here's how SyncRx™ works:

Depending on where you live, each month at the same time **your prescriptions are ready to be picked up or delivered right to you.** A week or so prior to your prescriptions being refilled, you will receive a call from your pharmacy to confirm which prescriptions are needed.

Best of all, **we'll call your doctor for refills or deal with your insurance company directly** to reduce or eliminate any hassles.

We simplify the process of taking your medications correctly. We ensure you are taking **the right medication at the right time** by setting you up with reminders when it's time to take your medications.

Synchronize Your Prescriptions

Save time and trouble by having all your prescriptions refilled at the same time each month.

Everything is handled for you, only one trip to the pharmacy to pick up your prescriptions, or we can deliver them to you.

It's easy and convenient!

Synchronize your prescriptions. Simplify your life.
